

## Food Safety Policy

We at FINÈST FROZEN YOGHURT (PTY) LTD, are committed to producing frozen yoghurt of high quality, and which meet all the requirements for food safety for our customers.

We will identify all statutory and regulatory requirements governing food manufacturing, storage and distribution and ensure that we comply with all the regulatory requirements in all our operations. Senior Management of the organization will provide clear lines of internal and external communication on any matter relating to food safety management system.

Factory hygiene standards are of utmost importance in everything that we do, and we will ensure that we maintain high hygiene standards in all our production facilities to prevent product contamination. We will conduct hazard analysis in all our operations and put appropriate control measures in place to prevent product contamination.

Our employees are our most important asset, and every care will be taken to train employees on food safety and personal hygiene standards. Our culture will be characterised by mutual trust between ourselves and our employees. Our employees will be encouraged to be proactive in identifying and reporting any conditions that may impact negatively on food safety during operations.

The suppliers of our raw materials will be carefully selected to ensure that raw materials used during manufacturing do not impact negatively on our final products.

Our food safety management system will be supported by measurable food safety objectives that are monitored on a regular basis. Continual improvement program will be an important part of our food safety management system.

To achieve this, FINÈST FROZEN YOGHURT (PTY) LTD commits to providing all the resources required for achieving the food safety standard required by customers. Senior Management have decided to comply with the requirements of SANS 10330:2020, an international food safety management system standard based Hazard Analysis and Critical Control Points (HACCP) system.
